APPENDIX.

TABLE I.

Area, Houses and Population.

The figures in this Table relate to the whole of the Indian Empire, except West Mōng Linn and those parts of the North Shan States situated on the east of the Salwin river, which were affected by the outbreak of the Wa tribe, Kharan, Western Sinjrami and Makran, and certain areas on the external frontier of India where tribal disputes and the possibility of disturbances rendered it inexpedient to attempt to take a Census.

In the hills to the east of Minipur, in Karen, in the Kachin districts of the North Shan States, in certain villages of the Myitkina, Bhamo and Upper Chindwin districts, and in the Pakokku Chin Hills the population was calculated by multiplying the number of houses by the average number of persons per house, the latter figure being ascertained by a careful enumeration of a number of typical villages.

In the case of the Andamanese and Nicobarese, and the Marris, Bugtis, and other more or less nomadic races of Baluchistan, the standard form of Schedule was modified to suit the simpler conditions of tribal life and the intelligence of the persons enumerated.

Andamans and Nicobars. The area shown in column 2 is that of the islands as a whole, the area of the penal settlement is nominally 173 square miles, but only 827 square miles are in actual occupation. The number of villages in column 4 refers only to the penal settlement; it includes 29 stations or places where labouring convicts are kept and 34 villages inhabited by free persons or self-supporting convicts. Columns 8–16 of the Table, include 1,882 Andamanese (1,036 males and 846 females) 6,310 Nicobares (3,336 males and 2,974 females), enumerated for the first time in 1901, besides 201 foreign traders (males) in the Nicobars.

Assam includes South Lushai and the Native State of Manipur now under British management during the minority of the Chief.

In *Bal. chistar (Districts and Administered Territories)* the Census extended to Quetta-Pishin, Thal-Chotiali, Zhob, Bolan and Chagai, with an aggregate area of 36,397 square miles. The area of 45,804 square miles shewn in the Table includes Western Sinjrami (9,407 square miles) which was omitted from the Census.

Burma includes the Shan States, the Chin Hills and Karen, enumerated for the first time in 1901.

Madras The figures include the five Laccadive islands attached to the Malabar District containing 1,851 houses with a population of 10,274 persons—4,971 males and 5,303 females. The area is about 21 square miles. There are no towns in the Laccadives, and each island has been treated as a village for Census purposes.

The statistics for the newly formed *North-West Frontier Province* include the Punjab Districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan, the Kurram Valley and the Shirani country, and the troops stationed in Chitral and Dir, the Swat Valley, and the Malakand. The area and population of the Punjab (No 18) have been reduced in proportion.

In *Baluchistan (Agency Tracts)* the Census embraced the Marri and Bugti country, Kalat, and Las Bela, with an aggregate area of 40,580 square miles. The area of 86,511 square miles given in the Table includes Kharan and Makran (45,931 square miles) where there was no Census. The total area of Baluchistan, including Districts, Administered Territories, and Agency Tracts, is 132,315 square miles.

Central India includes the figures for Gwalior State, which is also shown separately.

Madras States include Bangalore, Pudukkottai, and Sandur, as well as Cochin and Travancore, but the two latter are also shown separately by reason of their importance and historical interest.

The table does not include the population of French and Portuguese India, which is shown below. The Census of French territory was taken on the 1st March 1901 at the same time as that of British India. Portuguese India was enumerated on the 1st December 1900 synchronously with the Kingdom of Portugal.

	POPULATION			FRENCH OR PORTUGUESE SUBJECTS			BRITISH SUBJECTS AND OTHERS		
	Persons.	Males.	Females	Persons	Males.	Females	Persons	Males.	Females
French Possessions	273,185	133,502	139,683	241,455	117,174	124,281	31,730	16,328	15,402

TABLE II.

Variation in Population since 1872.

The Census figures of 1891, 1891, and 1872 have, as far as possible, been adjusted for changes of jurisdiction so as to show the population, at those dates, of the various Provinces and States as now constituted. The figures thus arrived at necessarily differ from those given in the old reports, which have ceased to be of general interest.

No statistical value attaches to the India total for 1872, which omits several important provinces not then enumerated, and includes in certain cases figures for different years, some earlier and some later than 1872.

Assam—columns 5, 13 and 17.—The Census of 1872 was condemned as incorrect, and a fresh Census was taken in 1878, the figures of which have been used here.

Arunachal—columns 2 to 5.—The figures for 1901 include the population of Manipur, 283,165, and of the Lushai Hills, 82,134. In 1891 the Census papers of Manipur were destroyed in the insurrection, and the population of the Lushai Hills, estimated at 43,634, refers only to part of this district as now constituted. Both Lushai and Manipur were excluded from the Census of 1872, and in 1891 Manipur alone was enumerated, the population at that time being 221,070.

Bihar—columns 5, 13 and 17.—Population of 1867

Burma—No Census was taken in Upper Burma prior to 1891

Central—columns 5, 13 and 17.—Population of 1871.

Madras——The figures for 1901 include the population of the 5 Laccadive Islands which form part of the Malabar district. In columns 5, 13 and 17 the population of 1871 has been shown. Columns 3, 11 and 15 give the figures of the Census of 1891 adjusted for changes in area. These adjustments could not be carried further back, consequently the figures in the columns headed 1891 and 1872 (1871 for Madras) give the population as it stood at the time of the Census of those years.

Punjab—columns 5, 13 and 17.—Population of 1868

United Provinces of Agra and Oudh——The first Census of Oudh was taken in 1869, the figures in columns 5, 13 and 17 represent the population of that year.

Cochin and Travancore—columns 5, 13 and 17.—Population of 1875

Mysore—columns 5, 13 and 17.—Population of 1871.

United Provinces States——The first Census of Tehri-Garhwal, one of the two States, was taken in 1881. The figures included in columns 5, 13 and 17 for this State are from an estimate made in 1874.

TABLE II.

Variation in Population since 1872.

PROVINCE, STATE OR AGENCY	PERSONS				VARIATION—INCREASE (+) OR DECREASE (-)

TABLE II-A.

Variation in Population on the Area enumerated in 1891.

In this Table the population enumerated for the first time in 1901 has been deducted with the object of bringing out more clearly the variations produced by natural causes during the last ten years. The figures relate to the various administrative divisions as they stood in 1891.

Andamans and Nicobars Column 2 has been adjusted by deducting the aboriginal tribes which were not enumerated in 1891.

Aesar Columns 2 and 3 The population of areas enumerated for the first time in 1901 has been deducted and a minor change of jurisdiction adjusted.

Baluchistan has been omitted from the Table as no comparison is possible.

Bombay The figures have been adjusted with reference to some small changes of jurisdiction.

Burma The population of the Shan States and Chin Hills enumerated for the first time in 1901 has been deducted from the figures for that year.

Punjab (with North-West Frontier Province) Population of newly enumerated areas has been deducted.

Bengal States Figures adjusted with reference to Sikkim which was imperfectly enumerated in 1891.

Rajputana The figures for 1891 include the Bhil population roughly enumerated in that year.

TABLE III.

Towns and Villages classified by Population.

In this Table, as in Tables I and IV, cantonments have been treated as forming part of the towns which they adjoin.

Column 3 includes the following number of persons enumerated in railway premises, barracks, camps, etc., or relief works —

As per	.	.	41,147
Baluchistan (District and Administered Territories)	45,052	(2,103 in railway and 42,649 nomadic population)	
Bengal	179,063		
Bombay	154,782		
United Provinces . . .	33,972		
Baluchistan (Frontier Tracts)	314,691	(nomadic population)	
Bengal States . . .	1,294		
Bombay States . . .	16,225		
Hyderabad State . . .	12,010		

In Provinces and States other than the above railway travellers, wayfarers and persons enumerated in encampments are included in the population of the places at which they were enumerated.

In the Andamans and Nicobars, column 3 includes 1,842 Andamanese and 6,810 Nicobarese enumerated for the first time in 1901, without any details, besides 201 foreign traders in the Nicobars.

In the Punjab the same column includes 24,087 persons enumerated in the Baluch trans-frontier country without further details.

Towns and Villages classified by Population.

TABLE IV.

The Urban Population and its Variation.

The term town includes every municipality of whatever size, all civil lines not included within municipal limits, every cantonment, and every other collection of houses, permanently inhabited by not less than 5,000 persons, which is of an urban character though not under municipal government. The numerical test was not however strictly applied, and many places containing under 5,000 inhabitants were, for special reasons, treated as towns in the Census, while others with a population of over 5,000 were omitted.

The table takes in four censuses and gives the net variation for the period 1872-1901 as well as for each decade within the period. Where the first Census took place in 1881 the column for 1872 is blank, in the cases, mentioned in the explanatory note to Table II, the figures given in that column are for some year other than 1872.

The three Presidency towns are entered first and the remaining towns are grouped in six classes. The first class consists of towns containing a population of 100,000 and over, the second from 50,000 to 100,000, the third from 20,000 to 50,000, the fourth from 10,000 to 20,000, the fifth from 5,000 to 10,000 and the sixth of 5,000 and under. In the first three classes the towns are arranged alphabetically in each class and in the last three the number of towns and the aggregate population in each class are shown.

For many places now treated as towns for the first time it has been found impossible to ascertain their former population. There are also certain towns where the population is recorded but the distribution by sex cannot be given, so that the population does not agree with the figures in the sex column.

TABLE V.

The Urban Population by Provinces, or States, and by Religion.

This Table shows the territorial distribution of the urban population of 1901 by religion.

As in Table IV, the towns are grouped into six classes according to their population. In the first three classes they are arranged alphabetically in each class, while in the last three only the number of towns and the aggregate population in each class are shown.

The Jewish religion has in all cases been included in "Others and Unspecified" (columns 22-23). In Burma these columns include Jains, in United Provinces Aryas, Sikhs, Parsis, and Buddhists, and in Rajputana Brahmos and Zoroastrians.

TABLE V.

Towns arranged Territorially with Population by Religion.

TABLE VI.

The Population by Religion.

The general arrangement of the Table is the same as in the Census of 1891. Vedic Theists (Arya Samaj) and Eclectic Theists (Brahmo Samaj) are included in the general total of Hindus, but are also shown separately. The term Animistic denotes the primitive forms of belief which are found among the jungle tribes, Mundas, Santals, Bhils, etc. Animism may be defined as the belief which traces everything in the world, from the greater natural phenomena to the various diseases and misfortunes which afflict mankind, to the action of numberless undefined forces, beings, or spirits, among whom, on the theory which gives rise to the name, the souls of departed chiefs and ancestors are supposed to occupy a prominent place. There is no name for these beliefs in any Indian Vernacular and the enumeration of their adherents was effected by directing the Census officials to enter the name of the tribe in the column for religion in the case of those persons who did not describe themselves as Hindus, Moslems, or Christians.

The number of columns in the Table has been reduced from 70 to 43 by including under Minor Religions a number of indefinite beliefs which were shown separately on the last occasion.

Andamans and Nicobars.—Columns 38—40.—Include 1,882 Andamanese (1,086 males and 846 females) and 6,310 Nicobarese (3,386 males and 2,974 females), enumerated for the first time in 1901. Columns 41 and 42 include 201 foreign traders enumerated in the Nicobars.

Burma.—Columns 41—43.—Include 127,011 persons (59,625 males and 67,386 females) enumerated by estimate in the wilder parts of the country whose religion was not recorded. Most of them were probably Animists.

Madras.—The figures include the five Laccadive islands attached to the Malabar District containing a population of 10,274 persons (4,971 males and 5,303 females) of whom 10,263 are Moslems, 9 are Hindus and 2 are Buddhists.

The figures for Aryas in the Punjab and North-West Frontier Province are an estimate. In the present Census of the Punjab the Arya Samaj was not treated as a separate religion and only the males of the age of 15 and over were tabulated as a sect of Hindus, the numbers recorded being Punjab, British Territory, 8,377, Punjab, Native States, 282, North-West Frontier Province, 496. For the purposes of this Table it has been assumed (a) that the proportion of males under 15 among Aryas is the same as among the Hindu population generally, and (b) that the proportion of females is the same as that actually recorded in 1891. The second assumption makes allowance for the fact that many of the Aryas have joined the Samaj after their marriage and that their wives have retained their original beliefs.

TABLE VII.

Age, Sex and Civil Condition by Religions.

The ages of the people returned represent the actual number of years completed, not the current year of age.

According to the instructions each person, whether infant, child or grown-up, was returned as either married, unmarried or widowed. Divorced persons were returned as widowed. A woman who has never been married was entered as unmarried, though she was a prostitute or was living with a man. Persons who were recognised by custom as married were entered as such even though they had not gone through the full ceremony.

This Table is divided into two parts. Part I contains the statistics for India for the total population and for each main religion. The Jewish religion has been included in Minor and Unspecified. Part II gives the statistics for the total population and three largest religions for each of the 17 principal Provinces, States and Agencies.

The population dealt with in this Table falls short of that returned in Tables I and VI by 983,756 persons enumerated in tracts where age and civil condition were not recorded.

The following statement shows the distribution of the above population territorially and by religion —

District or State	Persons			Religion	Persons		
		Males	Females			Males	Females
Andamans and Nicobars	9,703	4,673	3,820	Hindu .	38,201	25,610	12,694
Baluchistan (Districts and Administered territories)	909,216	178,526	129,720	Sikh .	2,972	2,503	469
				Jain .	8	3	5
Burma . .	127,011	59,625	67,386	Zoroastrian (Parsi) .	166	90	76
Punjab and North-West Frontier Province	37,606	21,253	16,353	Musselman .	802,838	135,211	367,627
Baluchistan Agency	502,500	266,991	235,506	Christian . .	1,026	3,925	701
				Animistio	8,192	4,372	3,820
				Minor and unspecified	127,260	59,857	67,403
India	983,756	530,971	452,785	India .	983,756	510,971	452,785

Besides the above, particulars of age were not available for one Sikh (male), 7 Buddhists (5 males and 2 females), 55 Parsis (30 males and 25 females), and 18 Jews (9 males and 4 females) in Bangalore Civil and Military Station. They are included in the figures for A—India, but are excluded from the statistics of those religions.

TABLE VII.

Age, Sex and Civil Condition.

TABLE IX.

Education by Selected Castes, Tribes or Races.

EXPLANATORY NOTE.—This Table is intended to show the diffusion of education through different social strata. It deals only with selected castes or tribes typical of a particular strata and does not include every caste however small or unimportant. The principles that were laid down for selecting castes are the same as govern Table XIV, and they are to be found in the explanatory note to that Table.

Within each Province, State or Agency, the castes are arranged in order of literacy, i.e., the caste with the highest percentage of literates is put at the top.

This table, the compilation of which was optional with Census Superintendents, has not been prepared for Baluchistan, Punjab, Hyderabad, Kashmir and Rajputana.

T A B L E X.

Language.

The Table shows all the languages ordinarily used by persons enumerated—dialects being included in the languages to which they belong. It is divided into four parts Part I is a general Table showing for each Province, State or Agency the number of persons who use A Vernaculars of India, B. Vernaculars of other Asiatic countries, Africa and Australia and C European languages Part II gives the distribution of the languages by linguistic families, based on the classification framed by Dr G A Grierson, C.I.E., Ph.D., in charge of the Linguistic Survey. Part III shows the territorial distribution of each language and Part IV gives for each Province, State or Agency, the number of persons speaking each language

Columns 2—4—Include persons whose language was not returned or could not be identified, as follows —

PROVINCE, STATE OR AGENCY	Persons	Males	Females
INDIA.	1,048,223	549,739	498,484

* In all provinces Bihari and the various forms of Hicai were for the most part, returned merely, as Hindi or Urdu. In the United Provinces and elsewhere the total was distributed for the purpose of Table X amongst the different languages according to a linguistic distribution list prepared by Dr. Grierson, but in Bengal it was shown in Table X merely as 'Hindi', and the approximate distribution was indicated in the corresponding chapter of the Report. For the purpose of the above statistics the whole of the 'Hindi' speakers in Bengal have been classed under 'Bihari'.

† Included in Gujarati as well as shown separately.

TABLE XI.

Birth-place.

The Table is divided into four parts—

PART I—Is a general summary giving for the whole of India and for each Province, State or Agency the number of persons born in India, in countries adjacent to India, in other Asiatic countries, in Europe, in Africa and so on. The columns headed 'Birth-place not returned,' include (a) 36,796 persons in various parts of India, who omitted to return their birth-place, (b) 762,039 persons in the Tribal Areas and Agency Tracts of Baluchistan and 127,011 persons in the wilder parts of Burma, where birth-place was not recorded at all.

PART II—The general groups of Part I are here distributed amongst the particular countries of which they are made up, and details are given for the whole of India and for each Province or State, showing the number of persons born in India and its various provinces, in Afghanistan, China, the United Kingdom, Cape Colony, Canada, etc.

PART III—Illustrates internal migration. Column 2 gives the total number of immigrants, that is to say of persons born in other parts of India who were unenumerated in the Provinces or States entered in the first column. Column 3 treats as emigrants those persons who were born in the Provinces or States shown in column 1, but were enumerated in other parts of India. The fourth column shows the balance of emigration or immigration in each case, and the subsequent columns give particulars of the net interchange of population which goes to make up the balance for or against any given Province or State. The details working up to the totals will be found in Part II. To take a simple instance—194 persons born in Ajmer were enumerated in Assam, and 18 persons born in Assam were enumerated in Ajmer. The difference 176 represents the net immigration from Ajmer to Assam and appears first in column 5 as the net gain of Assam from Ajmer, and again in column 7 as the net loss of Ajmer to Assam. Of the gross figures 194 is shown with details of sex in Part II under Assam, while 18 is entered under Ajmer. As Part III deals only with internal migration, immigrants born outside India are excluded from the statistics. In the absence of complete returns of emigration no attempt can be made to strike a balance between immigration and emigration for India as a whole but an approximate estimate will be given in the body of the Census Report.

PART IV—Shows the territorial distribution at the Census of the persons born in each Province, State or Country.

Birth-place.

TABLE XII.

Infirmities.

The infirmities recorded at the census were insanity, deaf-mutism, blindness and leprosy

The Table is divided into two parts. Part I contains a general summary showing the total number of infirmities of each kind recorded. The distribution of each infirmity by age is given in Part II

The 2,185 persons (1,863 males and 822 females) returned as suffering from more than one infirmity are entered under each, but are shown only once in column 2. The population afflicted therefore does not correspond with the aggregate of the totals of the several infirmities.

In Baluchistan infirmities were recorded only in the areas enumerated on the standard schedule, and in Burma they were not recorded in the Shan States, the Chin Hills, and the smaller areas where the population was estimated. The population for which infirmities were recorded in each case is as follows —

	Persons	Males	Females
Baluchistan	48,707	39,050	9,657
Burma	10,363,613	5,282,408	5,031,205

Travancore—In addition to the infirmities, for which information was collected throughout India, 5,924 persons (3,522 males and 2,402 females) were also recorded as afflicted with elephantiasis

TABLE XII-A.

Infirmities by Selected Castes.

The principles followed in selecting castes for this Table are to be found in the explanatory note to Table XIV.

Within each Province, State or Agency the castes are arranged in alphabetical order.

This Table, the compilation of which was optional with Census Superintendents, has not been prepared for Ajmer, Andamans, Assam, Baluchistan, Bengal, Punjab, Hyderabad, Kashmir and Rajputana Coorg and Mysore have also been omitted

TABLE XIII.

Caste, Tribe, Race or Nationality.

In 1891 castes were classified with reference to their traditional occupation. On the present occasion Mr. Risley requested the Provincial Superintendents to arrange them according to their social position and a classification made on this basis will be found in most of the Provincial Reports. In the general caste table, however, such a classification has been found impossible, partly because the social divisions and the standards by which they are determined vary in different parts of the country, and partly because it often happens that a caste does not everywhere enjoy the same status. In this table, therefore, the arrangement is alphabetical.

The table is divided into two parts. In Part I is given a general list of all the castes, etc., returned, with their distribution by religion, while Part II shows the distribution by locality of all castes with an aggregate strength of 10,000 or upwards. In some provinces castes have not been tabulated for the minor religions, and in such cases it has been necessary to give merely the religion totals in question under the head 'minor and unspecified' which also includes various small items which could not be identified or which did not appear to be real caste names. In one or two cases, moreover, e.g., in Burma, the distinction by religion was not preserved and a caste or tribe, some of whose members profess one religion and some another, were entered under the religion acknowledged by the larger number.

The preparation of this table which includes the castes and tribes returned in all parts of India, has been beset with many difficulties, partly on account of the inclusion in several of the local reports of many entries which are not the names of true castes, partly owing to the varying caste nomenclature in different parts of the country, especially in the case of the functional groups, and partly because of differences in the spelling of names which are really identical. Very often the difference of name in the case of functional groups indicates a real social distinction as in the case of Jugi, Pān and Tanti, Teh and Kulu, Agarwāl and Osawāl, etc., or a difference of locality which operates to keep the two groups entirely distinct, as with Shānán and Kalwár, or Kāyasth and Prabhu but elsewhere it does not, Alur and Goala cannot be distinguished, nor Baiti and Chunari, nor Bhuihár (not Bhunyár) and Bihāri, nor Hajjam and Nai or Nupit, nor Dukdekuila, Ladáf and Dhunia. And even where the terms do indicate actual differences there is generally a debatable land where they are interchangeable. In the Central Provinces, for example, the words Nai, Mhal and Bhundári are used indiscriminately though strictly the first applies only to Hindustani barbers, the second to Marátha ones and the third to those who are Oriyas, so also with Lohár, Kháti and Kammán in the same province and Tanti and Tatwa in Bihar. In the matter of spelling there are numerous local differences such as Badhai and Barhi, Chanan and Shánán, Hasala and Haslar, Kumuti and Komati, Khumi and Kumi, Kurumba and Korava, and the information available was not always sufficient to make the identification certain. Where any reasonable doubt seemed to exist the procedure usually adopted has been to show both groups separately and connect them with a note, as in the case of Chuhra and Bhangi, Sutar, Birhi and Tarkhan, Jhinwar, Kabar and Bhisti, Koh and Kori and so on. Where one group has been amalgamated with another, the original entry and the head to which it has been taken have been shown in the Index to Caste Classification in the Appendix to this Volume. It should be understood, however, that this Appendix refers only to the classification of the entries in the Provincial volumes made for the purpose of the general table for India. For the method adopted in each province in preparing the local caste table, the Provincial Reports should be referred to, in this connection it should be explained (i) that where different names are used for similar functional groups, there is usually some area, as in the case of the Central Provinces already mentioned, where the figures for each taken separately cannot be relied on, and (ii) that sometimes a group which has been treated as an independent caste in one province has been treated in another as a sub-caste and combined accordingly.

Lastly it must be remembered that similarity of name is not necessarily an indication of any real affinity. There is, for example, no affinity between Tarakan (a Malabar trading caste) and Tarkhan (the Punjab carpenter caste), or between Vaiti (a Bombay forest tribe) and Baiti (lime-burners in Bengal), or Marayan (temple servants) and Maravau (cultivators and cattle-lifters) or Khavas (domestic servants in Bombay) and Khawas (the slave caste of Nepal). It is possible that many of the groups which I have left separate, such as Pawaria and Bawaria ought to be combined, but it cannot be assumed that this is so merely on account of these verbal resemblances.

* Included in Koli (Kohli, Dagi) in Baroda.

† Included in Barhai (Bedeali, Badhoyi) in the Central Provinces.

‡ See Katis.

§ Khatik appears to be synonymous for Karal except in Bengal and the United Provinces where it is a caste of vegetable growers.

|| The persons shown as Khatris in Assam are almost all Manipuris who on conversion to Hinduism claimed to be classed as Kshatriyas.

TABLE XIV.

Civil Condition by Age for Selected Castes.

This Table is intended to illustrate the relative prevalence of infant-marriage and the prohibition of the re-marriage of widows in different parts of India and in groups of different social standing. It deals only with selected castes, and does not include every caste however small or unimportant.

The following principles were laid down for the guidance of Census Superintendents in selecting castes.—

- (i) No caste should, as a rule, be selected that does not number at least 10,000 persons in some one district
- (ii) For castes which number more than 10,000 in several districts, a district should be selected where the caste has been settled for a long time, and where it is likely to have maintained its typical customs without being affected by outside influences
- (iii) Ordinarily, it will not be necessary to compile figures for a larger number than the caste-population of a typical district
- (iv) Where a caste is known to be immigrant in one Province, and its typical settlements are situated in another Province, it should be dealt with in its Province of origin
- (v) An exception to the numerical standard of 10,000 may, perhaps, be made in the case of groups of special interest

From the castes selected in the Provinces a further selection has been made for this Table. Within each Province, State or Agency the castes are arranged according to the frequency of infant-marriage, &c., according to the percentage of girls married under 12 years of age.

Some details of castes shown in this Table have in Table XIII been classified under other heads, e.g., the figures for Sudra Das (Assam) have in that Table been added to those for Karbarita. Some of the castes shown in Table XIV do not therefore appear in Table XIII and in the case of others there is some difference in the strength shown in the two Tables.

In the case of Bombay the Table shows for each caste, (except Prabhu for which the actual figures are given) its distribution by sex, age and civil condition calculated on a basis of 100,000 and in the case of Burma the distribution by age and civil condition on a basis of 50,000 of each sex.

CENTRAL PROVINCES.—The figures against age-periods 5—12 and 12—15 represent, respectively, those for age-periods 5—10 and 10—15.

TABLE XV.

Occupation or Means of Livelihood.

For the purpose of this table, a classified scheme of occupations was drawn up on the general lines as that adopted in 1891, but several new groups were added in order to distinguish between hand industries and those of factories, and also, in some cases between makers and sellers

In 1891 no attempt was made to distinguish workers from dependents, but on the present occasion the two classes have been shown separately On the other hand, the classification of occupations according to age has been abandoned Another important point of difference in procedure is that whereas in 1891 persons who combined some other occupation with agriculture were shown in the main occupation table under the non-agricultural head, on the present occasion they have been shown under the head, whether agricultural or non-agricultural, which was returned as their principal means of support.

All occupations are divided into eight main classes, these classes are sub-divided into 24 orders and 79 sub-orders, and the sub-orders are further divided into 520 groups

This table is divided into three parts—Part I is a general statement showing the total strength of each group for the whole of India, Part II shows for each Province or State the population supported by each order of occupation and the number of dependents, and Part III gives the Provincial distribution of actual workers by sub orders - Occupations in cities are shown in a separate table at the end of this volume

The total population in this table differs from that in Table I by 173,010 persons whose occupation was not returned, of whom 8,393 were in the Andamans, 127,011 in Burma, 13,519 in the Frontier Province, and 24,087 in the Punjab
